ACADEMIC PROJECTS

- As part of the B.Tech 2nd year course project (team of four), we created a social media web application using Flask.
- Did a machine learning project on covid-19 analysis using python.
- As part of the project for the AI course our team of four analysed different algorithms to solve different levels of a sudoku puzzle and compared them.
- As part of the project for the course on Blockchain Technology, our team of three created our own crypto tokens and sold it by integrating the smart contracts to a website.
- As part of my minor project for my 6th semester, we deployed an automatic hindi speech recognition system on raspberry pi.
